Facial treatments from Ericson Laboratoire

Enzymacid

Thanks to the combination of microdermabrasion, chemical peel, and enzymatic peeling, the skin will make a true transformation. The condition of your skin will quickly improve as the peeling makes your skin feel fresh and “new”. Enzymacid is suitable for all ages and for almost all skintypes. (Do not expose your skin to the sun after your peeling for about 24 hours and a sensitive skin.)

Sensitive

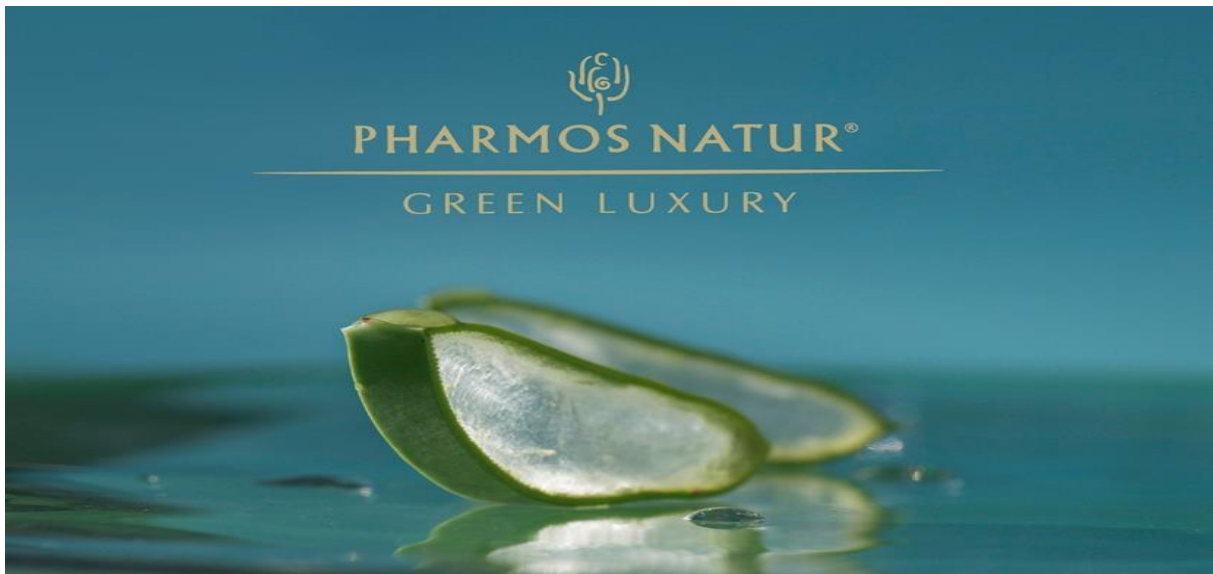

A sensitive skin is a skin that reacts faster and more violently to external factors such as weather effects. Hyperactivity is when the skin is showing signs of red spots, couperosis etc. This treatment is therefore a true S.O.S. care. The products contains boswellia extract, which reduces irritation, red spots, and works anti-inflammatory.
